

QA&TEST presents the 7th edition

QA&TEST 2008, the International Conference on QA & Testing for Embedded Systems will be held in Bilbao, Spain, 29, 30 and 31 October. QA & TEST is addressed to Testing Professionals, and Software Quality and Development Technicians.

QA & TEST Programme repeats a system that comes guaranteed by the success of previous editions: two tutorials, 20 presentations and three keynotes. The tutorials, four hour sessions in which the speaker offers his perspective on technologies and tools, and show the practical aspects for its implementation. QA&TEST 2008 will have two exceptional speakers for the tutorials: Derk-Jan de Groot, Collis testmanager, and Paul C. Jorgessen, professor of Programming at Grand Valley State University in Michigan. The presentations, 45-minute sessions dedicated to a topic on testing and quality software in embedded systems, will be divided into six tracks: Test automation, Techniques Testing, Testing Organisations, Test Management, QA Management and Configuration Management.

As in previous editions, the International Technical Committee will propose three people of the testing world to give the keynotes, 45-minute special lectures on a specific topic related to testing and embedded systems.

Exhibitors

QA & TEST 2008 account of three confirmed *exhibitors Telelogic, an IBM company, Steria and Visure Solutions.*

Telelogic, an IBM company, Telelogic is the leading global provider of software and services for Enterprise Lifecycle Management. Award winning Telelogic products go beyond Requirements Management and Application Lifecycle Management by combining the voice of the customer with business objectives to drive development of products, applications, advanced systems and software.

Steria is a company that offers integrated services like critical processes business consultancy, and development and management information systems. As a European leader in global IT services to companies that consider new technologies vital part of its business strategy, Steria is focused on building relationships of trust with their customers.

Visure Solutions is a newly created Spanish company specialized in management and engineering resulting from the spin-off of the business unit TCP SI Requirements Tools. Visure Solutions has been defined as “The Requirements Company”, because of its goal of becoming the specialized technology leader in management and engineering requirements.

Once again, QA & TEST 2008 will bring together experts and leading companies in Software Testing and Quality from all over the world, a fact that confirms the growing interest in software quality and turns QA&TEST into a conference imperative for professionals of this sector.
